94th COVID-19-Related Fatality Reported

The Joint Information Center was notified that Guam's 94th COVID-19-related fatality occurred at the Guam Memorial Hospital (GMH) at 10:10 a.m. The patient was a 73-year-old female with underlying conditions that were further compounded by COVID-19. She was transferred to GMH from the Guam Regional Medical City (GRMC) on November 7, 2020 and was a known positive case.

"To her family and friends, may you find comfort from the support of an island who mourns with you. Please accept our sincere condolences and sympathies," said Governor Lou Leon Guerrero. "Our hearts may be troubled and our troubles and sorrows may seem everlasting, but if we remain true to our commitment, we can overcome."

Cumulative Results

To date, there have been a total of **6,121** officially reported cases of COVID-19 with **94** deaths, **2,085** cases in active isolation and **3,942** not in active isolation.

As of November 15, 2020, the COVID Area Risk (CAR) Score remains at 41.5 and will be recalculated once reports from all participating labs are up to date through the weekend. The CAR Score accounts for the incidence of new cases, how well current testing identifies these cases, and the rate of spread. An ideal CAR Score for Guam would be 5.0 and below. To learn more about the CAR Score, visit [Strive for Five](#).

The following breakdown provides cumulative COVID-19 test results reported to the Joint Information Center on Sunday, November 15 and reflects results from Saturday, November 14:

Laboratory	New Cases Reported on Sunday, November 15	Samples Tested on Saturday, November 14	Total Negative Tests (March 12 - November 14)	Total Reported Cases (March 12 - November 15, 2020)
